

Cozy Winter Fleece Hat for Toddlers

Sewing pattern for children ages 1-2 years old

Before you begin

All measurements take into account a 1/2 in seam. This pattern is designed for a child around age 1. The measurements I took were for my child who has a 19" head circumference and 5" from crown to top of ear. Equations for calculating different sizes are included in this pattern.

Material list

- 1/2 yard of fleece in two complementary colors or patterns
- 2 Buttons
- Thread

Steps

1. Cut out all pieces in both colors. All sewing will be with right sides together.
2. Using first color, sew together 4 pieces for top of hat, with curved sides together, to form a circle.
3. Sew band to bottom of circle.
4. Sew ear flaps on opposite sides.
5. Sew square to front of hat.
6. Repeat steps 2-5 with second color.
7. Pin together two colored hat pieces, and sew around all, leaving one ear flap undone.
8. Push hat inside out. Right sides should now be completely on the outside.
9. Sew ear flap closed, then top stitch over entire hat edges.
10. Pin up front square and hand-sew or machine sew two buttons onto the front top corners. This should hold the square in place.

Cutout instructions on next pages →

Top of Hat (cut 4)

To calculate base width (W), take your child's head circumference, divide by 4 then add 1" for the seam. For example, if your child's head measures 25" in circumference, take $25 / 4 = 6.25$ plus 1" seam = 7.25" for each base

Ear Flaps (cut 2)

Ear flaps are standard 4x4". If you would like them bigger or smaller, cut accordingly.

Band and Square (cut 1 each)

Make 1 band 20 x 3 inches (bottom of hat)

To calculate other widths, measure circumference of head plus 1" for seams. The height is always 3".

For example, for a 25" circumference head, cut a band measuring 26x3".

Make 1 square 5.75 x 4.5 inches (front of hat)

This should be the same size as (1) Top of Hat piece you cut out on the previous page
